Quick-start guide

Mizan

The finance dashboard for your small business. Set up in 10 minutes.

01

Before you start

Mizan is one file with 7 sheets. It works in Excel, Google Sheets, Apple Numbers and LibreOffice. No add-ons, no internet connection needed.

> **The only rule: type in the yellow cells. Every other cell holds a formula that does the work for you.**

- Google Sheets: go to drive.google.com → New → File upload → open the file → File → Save as Google Sheets.
- Excel: open the file. If you see "Enable editing", click it.
- iPhone and iPad: open it in Numbers or Excel.

02

Step 1: Start here

Enter your business name, currency, year, the tax rate you want to set aside, and your monthly income goal.

Below are your income categories, expense categories and payment methods. Edit them to fit your business — up to 15 of each. They appear as dropdowns in Transactions.

> **The file comes with sample data so you can see it working. When you are ready, open Transactions and clear columns A to G.**

03

Step 2: Log transactions

Every time money comes in or goes out, add a row in Transactions: date, type (Income or Expense), category, description, client or vendor, amount and method.

- Month and Year fill in by themselves.
- Use the filters on the header row to see one client or category.
- A simple habit: five minutes every Friday to log the week.

04

Step 3: The dashboard

See your whole business at a glance: total income and expenses, net profit, margin, how much to set aside for tax, and your average monthly income.

Below that: a monthly table with goal progress, an income-vs-expenses chart, a profit chart, and where your money goes by category.

> **One question every month: which expense category grew more than it should? That alone can raise your profit.**

05

Invoices, pricing and clients

- Invoice: pick a client and their email and city fill in. Add your lines, then print or save as PDF (File → Print → Save as PDF).
- Pricing: enter materials, your time, fixed costs and payment fees, and get a price that protects your margin.
- Clients: every client with total paid, number of transactions and last transaction date, all from your log.
- Goals: your target for each month against what you actually made, with a progress bar.

06

FAQ

- Is there a subscription? No. One payment, the file is yours.
- Is my data safe? The file lives on your device or your own Google account. We never see it.
- New year? Change the year in Start here, or keep one copy of the file per year.
- Not using dollars? Type your currency symbol in Start here.
- Stuck? Reply to your order email and we will help.
